12317 4W2 ARR ARR ARR Alt S
Above class requires permission of instructor. Most entry level archaeology jobs require a field school and this class provides that qualification. This course will be held off-campus in St Claire County Illinois and is an opportunity for students to learn the methods and theories of archaeology by actually doing archaeology. Students will conduct excavations in a 1000 year old village and survey areas surrounding mounds and caves. Housing will be provided but a housing fee and instead of a textbook students will need to assemble a dig kit. For more information contact professor Alt susalt@indiana.edu

Above class designed to help you prepare for upper-level Biology courses. Therefore, class time is utilized for collaborative, active, and inquiry-based activities meant to deepen your understanding of course topics and to provide practice in disciplinary thinking (e.g., visualizing biological processes, making predictions, drawing conclusions from data, and reading and analyzing scientific publications). Because students learn and retain information best when they are actively engaged during class, the structure of this course is flipped relative to that of a traditional classroom. There will be two, highly interactive, required class meetings per week. Before each class, you will view recorded lectures, participate on Canvas discussion board, read textbook, and complete textbook-related online activities. Your out-of-class studies will be guided by video outlines and/or question banks. Our weekly three-hour sessions will include individual quizzes, team-based quizzes, team-based activities, and whole-class discussions.
